VPWS

BUTT WELDING MACHINE

## VPWS – 200 (M) Butt welding machine

### Application and Features:

- Welding ranges: 63 mm – 200 mm  
(63,75,90,110,125,140,160,180,200)
- Suitable for butt welding machine of plastic pipe and fittings made of PE, PP and PVDF
- Consists of basic frame, planing tool, heating plate
- Removable PTFE coated heating plate with high accurate temperature and control system and electrical planing tool
- made of lightweight and high strength material; simple, small and user friendly .
- Lower starting pressure ensures reliable welding quality of small pipes
- Changeable welding position enables to welding various fittings more easily.
